Availability: Serving notice period — Last working day 30 September 2026

PROFESSIONAL SUMMARY

Results-driven **DevOps & Cloud Engineer with 4 years** of hands-on experience designing, automating, and operating cloud-native infrastructure on **AWS**. Specialised in **CI/CD pipeline development**, **Kubernetes (EKS)** container orchestration, **Infrastructure as Code** using Terraform and Ansible, and end-to-end observability. Delivered highly available, fault-tolerant platforms for real-time messaging (WebRTC) and OTT streaming supporting **1M+ concurrent users**, sustaining **99.9% uptime**. Experienced in multi-account AWS architecture with AWS Landing Zone, GitOps workflows, and DevSecOps practices including WAF hardening and static code analysis.

TECHNICAL SKILLS

- Cloud (AWS):** EC2, S3, VPC, VPC Peering, EKS, ECR, RDS, IAM, Route 53, CloudFront (CDN), SES, WAF, IVS, MediaConvert, Load Balancer (ALB/NLB), Secrets Manager, Certificate Manager, Landing Zone, Auto Scaling
- CI/CD & GitOps:** Jenkins (scripted pipelines), GitLab CI, GitHub Actions, Azure DevOps, AWS CodePipeline, ArgoCD, SonarQube, Nexus Repository Manager
- IaC & Configuration Management:** Terraform, Ansible
- Containers & Orchestration:** Docker, Docker Compose, Kubernetes (EKS), Helm
- Monitoring, Logging & Observability:** Prometheus, Grafana, Loki, Mimir, Uptime Kuma
- Web Servers, Proxy & SSL:** Nginx, Apache, Caddy, Certbot, Let's Encrypt
- Messaging & Streaming:** Kafka, RabbitMQ, Redis
- Databases & Storage:** MySQL, MongoDB, Cassandra, Elasticsearch
- Realtime & Signaling:** Janus WebRTC, STUN/TURN
- OS, Version Control & Scripting:** Linux (Ubuntu), Git, GitHub, GitLab, Bash Scripting

PROFESSIONAL EXPERIENCE

- DevOps & Cloud Engineer** (Designation: Cloud Administrator I) Dec 2024 – Present
CONTUS Tech, Chennai, India
- Built and managed **CI/CD pipelines** using Git, GitHub, GitLab CI, and Jenkins (scripted pipelines) to streamline deployments across real-time messaging and OTT streaming platforms, **cutting deployment overhead by 90%** and materially reducing release cycle time.
 - Automated infrastructure provisioning and configuration with **Terraform and Ansible** across hybrid and cloud-native environments, ensuring consistent, version-controlled, auditable resource management.
 - Deployed and managed **20+ containerised microservices** using Docker, Docker Compose, and **Kubernetes (EKS)**, improving deployment reliability and environment parity across Dev, Staging, and Production.
 - Implemented full-stack observability with **Prometheus, Grafana, Loki, Mimir, and Uptime Kuma**, enabling proactive monitoring, alerting, and log aggregation that sustained **99.9% uptime**.
 - Configured and managed **Nginx, Apache, and Caddy** reverse proxies with automated SSL certificate lifecycle management via Let's Encrypt and Certbot.
 - Administered distributed data and messaging systems including **Kafka, RabbitMQ, Redis, MongoDB, Cassandra, and Elasticsearch** for high-throughput, low-latency production workloads.
 - Managed extensive **AWS services**: EC2, S3, VPC, Route 53, CloudFront CDN, SES, WAF, Certificate Manager, ALB, MediaConvert, and IVS.
 - Hardened application security by implementing **AWS WAF rules mitigating OWASP Top 10** threat categories.
 - Integrated **SonarQube** for static code analysis and managed build artifact lifecycle using **Nexus Repository Manager**, embedding quality gates into the delivery pipeline.

Kadit Innovations, India

- Designed and implemented **AWS multi-account architecture using AWS Landing Zone**, creating isolated Dev, Staging, and Production environments to strengthen security posture and governance.
- Configured **VPC Peering** across AWS accounts to enable secure, low-latency inter-environment communication.
- Built and maintained **Azure DevOps pipelines** automating build and artifact creation, with artifacts centralised in AWS S3 for lifecycle management.
- Implemented **AWS CodePipeline** for continuous delivery across multiple environments, **reducing manual deployment overhead by 70%**.
- Developed **Infrastructure as Code with Terraform** for consistent, repeatable, and auditable provisioning of all AWS resources.
- Containerised applications with **Docker**, achieving full environment consistency across Dev, Staging, and Production and eliminating environment-drift defects.
- Managed and maintained **Kubernetes clusters** hosting production web applications with high scalability, resilience, and **zero-downtime deployments**.

KEY PROJECTS & PRODUCT HIGHLIGHTS

MirrorFly — Real-Time Messaging Platform

Delivered for enterprise clients including Masdr, Tirasoft, and Daz

- Self-hosted, white-label messaging solution supporting **1M+ concurrent users** with real-time chat, voice, and video communication.
- Built on a **microservices architecture** with backend components deployed via Docker, Kubernetes, and **AWS EKS** for high availability and fault tolerance.
- Integrated **WebRTC with Janus servers**, STUN/TURN configuration, and secure signaling to enable low-latency global video and audio communication.

VPlayed — OTT Streaming Platform

Trusted by enterprise clients including Blacksheep, Periyar Vision, and Reelies

- Customisable OTT platform delivering VOD and live streaming with **adaptive bitrate streaming and DRM** integration.
- Deployed as containerised services orchestrated via **Kubernetes**, with video transcoding handled at scale through **AWS MediaConvert**.
- Implemented global content delivery using **CloudFront CDN, S3, and Route 53**, including regional failover and cache invalidation strategies.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate *(In progress)*

EDUCATION

Master of Computer Applications (MCA) — Alagappa University <i>(Distance / Correspondence)</i>	2024 – 2026
B.Sc. Computer Science & Technology — Sri Paramakalyani College, Alwarkurichi	2019 – 2022
HSC & SSLC — A.V.Rm.V Matriculation School, Ambasamudram, Tamil Nadu	2019 / 2017

LANGUAGES

Tamil (Native) • English (Professional Working Proficiency) • Arabic (Beginner)
